Background and Objectives

The Second International Conference on Utility Management and Safety (第二屆國際管綫管理及安全會議) is calling for registration now. The First International Conference on Utility Management and Safety was held in 2009 and was a great success. This second conference aims to build on that success by providing an excellent platform for utility specialists to share their experience with delegates from around the world.

Delegates will have a unique opportunity to hear about the latest theories, practices and developments in utility planning, production, management and safety from the four corners of the globe.

Theme of Conference

Theme: Towards Sustainable Urban Development - How Utilities Affect the World
城市的可持續發展 - 管綫對世界的影響

The major topics for the conference program are as follows:

1.) Field Techniques & Materials:

Utility Surveys, Pipe Condition Surveys, Pipe Rehabilitation Methods and Materials, Water Leakage Detection, etc.

2.) Asset & Data Management:

Project Management, Training, Personnel, System, Program, Construction Design, GIS, Data Sharing, Risk Management Strategy etc.

3.) Safety & Health:

Safety Management, Construction Management, Damage, Pollution, Carbon Reduction etc.

Language

English is the official language. Simultaneous interpretation services will not be provided. Please refer to conference program for details.

Who Should Join

ICUMAS 2011 is a comprehensive education research and practice-oriented international conference for the engineering industry. It brings

- Government officials, policy decision-makers
- Academics and educators related to the industry
- Industry practitioners engaged in engineering, surveying, property management, roadwork contractors and utility and safety management
- Industry consultants
- Representatives of professional industry associations
- Students and others interested in the field
