

Hong Kong & Mainland China & Southeast Asia Surveyor Day 2015
--- Innovative & Collaboration

24th September 2015

Invitation for Hong Kong & Mainland China & Southeast Asia Surveyor Day 2015 --- Innovative & Collaboration

Further to the success of Surveyor Day in previous years, I'm delighted to inform you that The Chartered Institution of Civil Engineering Surveyors (ICES) is taking lead this year to organize Surveyor day 2015 which will be held on 20th November 2015 (Friday) at Paramount Banquet Hall (Tsim Sha Tsui). Chartered ICES is hosting this event and collaborate with The Royal Institution of Chartered Surveyors (RICS), The Hong Kong Institute of Surveyors (HKIS) and The Hong Kong Institution of Engineering Surveyors (HKIES).

This year, Surveyor Day 2015 is themed as Innovative & Collaboration. We shall invite professionals within this industry from Hong Kong and Mainland China and representatives from The ASEAN Federation of Land Surveying and Geomatics (ASEAN FLAG) to create exchange platform to achieve innovative collaborations. It will be an excellent opportunity for all individuals to meet professional delegates over local and Asia Pacific, it will also be a valuable opportunity to meet old friends, making new friends and extend our social networking among the industry in a relaxing environment.

The "One Belt One Road" policy in its aim to promote connectivity clearly complements China's going out strategy and supports the export of Chinese infrastructure on a grand scale. As of last year, preliminary results were achieved. An implementation plan was also conducted by the country and engaged in active communication and negotiation with relevant countries. After one-year deployment, the policy has begun to move towards the stage of pragmatic cooperation, which has generated huge market opportunities. In order to further facilitate the progress and promote the new concept, it requires to build strong awareness of the concept from the public, generate great exposure to the professions, media and public, connect tightly with industry members to facilitate communication and interaction, and being equipped with and supported by innovative as well as professional techniques.

The objectives of this event are to raise awareness of surveying profession importance for innovative development meanwhile invite overseas guest to share the worldwide trend of innovative development, provide networking opportunity for overseas collaborations and construction practitioners to link up and exchange ideas, grab attention from media to increase public exposure, which contributes to the achievement of the "One Belt One Road" policy.

Hong Kong & Mainland China & Southeast Asia Surveyor Day 2015
--- Innovative & Collaboration
