

Pavement Engineering

conducted by

Professor Alan Wong

BSc, MSc, PhD, CEng, MCIHT, CMILT, SMIES, AIStructE, FHKIE, FHKSTS, FHKICA, FHKCI

Professor Alan Wong is the Professor & Head of the Department of Construction Technology and Engineering, Associate Dean of Science and Technology of Technological and Higher Education Institute of Hong Kong (Thei)

In this seminar, Professor Alan Wong will share with us his views and experience on the Pavement Engineering. Pavement engineering is a branch of civil engineering that uses engineering techniques to design and maintain flexible (asphalt) and rigid (concrete) pavements. This includes streets and highways and involves knowledge of soils, hydraulics, and material properties. Pavement engineering involves new construction as well as rehabilitation and maintenance of existing pavements. Maintenance often involves using engineering judgment to make maintenance repairs with the highest long-term benefit and lowest cost.
