[CPD cert. would be charged to attendants: \$20 for members of organizers and supporting organizations and \$50 for walk-in guests. **No change will be given.**]

#### **Abstract:**

Smart GIS has been applied to create a smart community in many European and Asian cities, and Hong Kong is one of them.

Esri China (HK) will introduce how Real-time GIS make the Internet of Things (IoT) come to life. It performs real time spatial analytics generating immediate geographic patterns of large datasets. All these spatial data analysis can be visualized in 3D model and interactive with the public. Users will be able to collect, process, explore and analyse millions of sensor events in a second or a minute by one's desktop computer, web browser, or smartphone. The availability of resources for Smart GIS in Hong Kong will also be covered in the seminar.
