

SITE VISIT

Central - Wan Chai Bypass — Tunnel (North Point Section) and Island Eastern Corridor Link

The Central - Wan Chai Bypass and Island Eastern Corridor Link (CWB) is a strategic road along the north shore of Hong Kong Island targeted to alleviate the traffic congestion along the existing Gloucester Road - Harcourt Road - Connaught Road Central corridor. The contract is one of the eight contracts of the CWB. The project involves construction of a 300-metre-long tunnel and the approach road to the tunnel at North Point, modification/demolition works at the existing roads/junctions as well as associated works such as the construction of noise barriers, noise semi-enclosures, road drainage and landscaping works.

The site visit is jointly organized by the ICES and the Young Member Group of CIARB (EAB).
